## 2006 Title Index

**1936—A Banner Year for Strain Gages and Experimental Stress Analysis—An Historical Perspective,** Stein, P.K., 23-41 Jan/Feb

**A Comparison of Simultaneous and Sequential Single-Axis Durability Testing,** French, R.M., Handy, R., Cooper, H.L., 32-37 Sep/Oct

**A Novel Device for Yarn Pressure Variation Measurement in Wild Winding,** Drean, E., Osselin, J.-F., Bauer, F., Drean, J.-Y., 38-43 Jul/Aug

**Applications of Experimental Techniques in the Field of Pipeline Integrity Series – Part 3: Burst Tests of Pipeline with Extensive Longitudinal Metal Loss,** Freire, J.L.F., Vieira, R.D., Castro, J.T.P., Benjamin, A.C., 60-65 Nov/Dec

**Applications of Experimental Techniques in the Field of Pipeline Integrity Series – Part 1: Experimental Techniques in The Field of Pipeline Integrity,** Freire, J.L.F., Vieira, R.D., Benjamin, A.C., 44-50 Jul/Aug

**Applications of Experimental Techniques in the Field of Pipeline Integrity Series – Part 2: Experimental Strain Analysis of Metal Loss Defects in Pipeline,** Freire, J.L.F., Vieira, R.D., Benjamin, A.C., 42-47 Sep/Oct

**Biological Systems and Materials: A Review of The Field of Biomechanics and The Role of The Society for Experimental Mechanics,** Brown, E.N., Peterson, M.L., Grande-Allen, K.J., 21-29 Mar/Apr

**Development and Seismic Reduction Performance of Velocity and Displacement Dependent Hydraulic Damper,** Shih, M.-H., Sung, W.-P., Go, C.G., 41-45 May/Jun

**Drop Tester with Orientation Repeatability for Electronic Products,** Wang, H.L., Chen, S.C., Huang, L.T., Wang, Y.J., 31-36 Nov/Dec

**Electrohydraulic Pressure Control by A Self-Adjusting Proportional Derivative Controller,** Lovrec, D., Faber, F., 57-63 May/Jun

**Error Analysis of Digital Speckle Correlation Method Under Scanning Electron Microscope,** Wang, H., Xie, H., Ju, Y., Duan, Q., 42-45 Mar/Apr

**Experimental Aided Performance Evaluation Methods for Wafer Probe Test,** Liu, D.S., Shih, M.K., Liu, S.M., Huang, T., Chao, Y.C., Yu, C.C., 23-27 Sep/Oct

**Experimental Determination of Damage to Bearing Raceways in Rolling Rotational Connections,** Zupan, S., Kunc, R., Prebil, I., 31-36 Mar/Apr

**Experimental Modal Analysis on a Human Specimen: Lessons Learned,** Conza, N.E., Rixen, D.J., 51-55 Nov/Dec

**Image Correlation Applied to Single Crystal Plasticity Experiments and Comparison to Strain Gage Data,** LeBlanc, M.M., Florando, J.N., Lassila, D.H., Schmidt, T., Tyson, J., II, 33-37 Jul/Aug

**Impact Response Measurement of a Human Arm,** Fujii, Y., Yamaguchi, T., Valera, J.D.R., 64-68 May/Jun

**Intensity Integration Technique for Contouring Two-Dimensional Reflective Surfaces,** Subramanian, G., Ramana Kumar, P., 56-60 Jan/Feb

**In-Vacuum Photogrammetry of a Ten-Meter Square Solar Sail,** Pappa, R.S., Jones, T.W., Lunsford, C.B., Meyer, C.G., 46-51 May/Jun

**Lessons Learned in Modal Testing – Part 2: Smart Sensors, Dumb Engineers—How to Avoid Crossed Signals in Instrumentation,** Hunt, D., Brillhart, R., 67-71 Jan/Feb

**Lessons Learned in Modal Testing – Part 3: Transient Excitation for Modal Testing, More than Just Hammer Impacts,** Carne, T.G., Stasiunas, E.C., 69-79 May/Jun

**Lessons Learned in Modal Testing – Part 4: What's Shakin', Dude? Effective Use of Modal Shakers,** Mayes, R.L., Gomez, A.J., 51-61 Jul/Aug

**Lessons Learned in Modal Testing – Part 5: 101 Ways to Extract Modal Parameters—Which One Is for Me?,** Avitabile, P., 48-56 Sep/Oct

**Measurement of Concrete Permeability Under Stress,** Bhargava, A., Banthia, N., 28-31 Sep/Oct

**Measurement of Transverse Vibrations of Piezoelectric Ceramics by Atomic Force Microscopy,** Ragulskis, M., Maskeliunas, R., 37-41 Mar/Apr

**Method for Active Compensation for Transverse Vibrations of A Moving Paper Web,** Aubry, E., Vaclavik, I., Ragot, P., Perrenoud, A., 47-50 Jan/Feb

**Methodology to Determine Stresses Due to Own Weight by Using Residual Stresses Techniques,** Álvarez-Caldas, C., San Román, J.L., Rodríguez-Fernández, S., Olmeda, E., 29-32 Jul/Aug

**Microsample Tensile Testing of Platinum Alloys,** Kovalchick, C., Sharpe, W.N., Jr., 38-41 Sep/Oct

**Modal Space: Can Modal Parameters be Extracted for Heavily Damped Modes When You Can't See Them in the Measured FRFs?,** Avitabile, P., 13-14 Mar/Apr

# 2006 ET AUTHOR AND TITLE INDEX

**Modal Space: Is There Any Problem Running a Modal Test to 2 KHz but Only Analyzing up to 500 Hz?,** Avitabile, P., 13-14 Jul/Aug

**Modal Space: Should the Measurement Bandwidth Match the Frequency Range of Interest for Impact Testing?,** Avitabile, P., 15-16 Jan/Feb

**Modal Space: Someone Told Me That Operating Modal Analysis Produces Better Results and that Damping is Much More realistic?,** Avitabile, P., 25-26 Nov/Dec

**Modal Space: What Effect Can the Test Set up and the Rigid Body Modes Have on the Higher Flexible Modes of Interest?,** Avitabile, P., 19-20 May/Jun

**Modal Space: What is a Good MAC Value So That I Know My Model is Right?,** Avitabile, P., 17-18 Sep/Oct

**Multiaxial Miniaturized Load Cell for Measuring Forces Acting Through a Sternotomy,** Baleani, M., Peroni, C., Cristofolini, L., Traina, F., Silbermann, M., Sawaed, S., Viceconti, M., 23-28 Jul/Aug

**My Favorite Experiment Series – Part 4: Dropping a Ping Pong Ball,** French, R.M., 59-60 Mar/Apr

**My Favorite Experiment Series – Part 5: The Mechanics of Simple Bows,** French, R.M., Kirk, T., 66-68 Nov/Dec

**Optical Methods: Demonstrations of Laser Speckle Phenomena,** Cloud, G., 27-30 Nov/Dec

**Optical Methods: Parametric Analysis of Geometric Moiré,** Cloud, G., 17-19 Jan/Feb

**Optical Methods: Projection Moiré,** Cloud, G., 15-18 Jul/Aug

**Optical Methods: Reflection Moiré,** Cloud, G., 19-22 Sep/Oct

**Optical Methods: Shadow Moiré,** Cloud, G., 15-18 Mar/Apr

**Pressure Testing of Recyclable Transmission Lines for A Fusion Reactor,** Amrock, E., Barkey, M.E., Turgeon, M.C., 51-55 Jan/Feb

**Real-Time Determination of The In-Cycle Evolution of The Turbocharger Speed in Integrated Circuit Engines,** Perles, A., Guardiola, C., Yuste, P., Ors, R., 44-50 Nov/Dec

**Reliability Analysis of Mux-Demux Replicated Multistage Interconnection Networks,** Aulakh, N.S., 19-22 Jul/Aug

**Role of Finite Elements in Evolving the Slicing Plan for Photoelastic Analysis of Three-Dimensional Models,** Babu, K., Ramesh, K., 52-56 May/Jun

**Strain Gage Materials Processing, Metallurgy, and Manufacture,** Robinson, M., 42-46 Jan/Feb

**Technology Applications Series – Impact Studies on Structural Components Using a Free Flight Drop Tower,** Bhattacharya, S., Krishnamurthy, K.C., Rajendran, R., Prem Sai, K., Basu, S., 52-58 Mar/Apr

**Technology Applications Series – Lab Lessons Learned—Part 2: Road Quality Determination Using Vehicle Data,** Adams, D.E., Janas, J., Goyal, S., Braun, C., Seeniraj, G., Bono, R.W., 61-66 Jan/Feb

**Technology Applications Series – Lab Lessons Learned—Part 3: Tire Modal Impact Testing and Forced-Response Analysis,** Adams, D.E., Jaques, J., Strus, M., Vyas, A., Bono, R.W., 61-69 Mar/Apr

**The Design of a Modular Probe Incorporating Thick-Film Sensors for Detecting Phase Interfaces in Oil Well Primary Separator Plant,** Hale, J.M., White, N.M., Jaworski, A.J., Meng, G., Dyakowski, T., 37-43 Nov/Dec

**The Experimental Analysis for Force-Compression Performance of the Door Seal During Door Closing,** Zhao, J.-C., Hao, W.-S., 46-51 Mar/Apr

**The Western Regional Strain Gage Committee—A Brief History,** Wallace, J.P., 20-22 Jan/Feb

**Validating the Data Before the Structural Model,** Walter, P.L., 56-59 Nov/Dec

# ET SUBMISSION GUIDELINES

## *EXPERIMENTAL TECHNIQUES* GUIDELINES

Updated 12/05

*Experimental Techniques* (ET) is a bi-monthly news magazine designed for the practicing engineer or technician. It is devoted to relatively brief and informal "how-to-do-it" (or "how-not-to-do-it") articles, emphasizing experimental, analytical, and computational techniques and methods.

**CONTENT:** Provide the answers to the following 3 questions in the introductory paragraph:

1) Why is this work important?
2) Why should the reader read this article?
3) How can this work be used in a practical application?

### ARTICLE SUBMISSION SPECIFICATIONS

***NEW*—Submission Instructions:**

*Experimental Techniques* now offers authors, editors, and reviewers the use of our fully web-enabled online manuscript submission and review system. Manuscripts should be submitted to: http://mc.manuscriptcentral.com/ext.

The online manuscript submission and review system offers easy and straightforward log-in and submission procedures. This system supports a wide range of submission formats: for manuscripts—Word, WordPerfect, RTF.TXT, and LaTex: for figures—TIFF, GIF, JPEG, EPS, and PPT. **PDF is not an acceptable file format.**

**NOTE:** In case you encounter any difficulties while submitting your manuscript online, please contact the Editorial Office by clicking on the Instructions and Forms button at the top of the screen or email journals@sem1.com.

### GENERAL REQUIREMENTS

Please include the names and contact information of two potential reviewers for your manuscript.

A typical article would include 8–12 pages of double-spaced text, including tables and 6–10 figures.

The text of the article should be submitted in one file and should NOT include illustrations. Submit the text of the article in Microsoft Word, double-spaced using 10-point type. Include a list of Figure Captions as a separate page in the article document. Submit all figures in separate files using JPEG, EPS, TIFF, or Power Point. Postscript files are NOT acceptable. All figures must be black & white.

Metric units are used in the journal. SI Units (International System of Units) is the only acceptable system. Authors are directed to refer to 'Standard Number E 380' of the American Society for Testing and Materials for a complete description of the SI Units. If the primary measurement system used in the presented work is in American standard Units, then this may be used with corresponding metric values in parentheses.

### GENERAL INFORMATION

E/T reserves the right to edit the article for grammar and usage. Any article accepted by E/T becomes the property of the Society for Experimental Mechanics, Inc., to be published in E/T and other SEM publishing vehicles.
